

Varshitha G.A

Bengaluru,Karnataka | [+91-8088785958](tel:+91-8088785958) | varshithaga2003@gmail.com | [LinkedIn](#) | [Github](#)

PROFILE

Full Stack Developer with hands-on experience building scalable, production-ready web applications using **Django REST**, **React.js**, and **PostgreSQL**. Skilled in designing robust **REST APIs**, integrating AI pipelines and optimising system performance across cross-functional teams.

EDUCATION

Dr. Ambedkar Institute of Technology

BE — Computer Science and Engineering | CGPA – 9.0

Nov 2021 – Jun 2025

Bengaluru, Karnataka

SKILLS

Programming Languages: Python, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML, CSS, Vite.js, Tailwind CSS

Backend & Frameworks: Django, Django REST Framework (DRF), Celery, REST APIs

Databases: PostgreSQL, MySQL, SQLite

Cloud & DevOps: AWS, Docker, Firebase, GitHub, GitLab

AI / ML Tools: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain, Ollama (Llama 3)

Testing & Tools: Postman, Git, VS Code

AI Development Tools: Cursor AI, Windsurf, Antigravity, Github Copilot, ChatGPT,

EXPERIENCE

Innovyx Tech Labs: Python Full Stack Developer

Jul 2025 – Present

- Developed and maintained scalable full-stack web applications using **Python**, **Django**, **Django REST Framework**, **React.js**, and **Next.js** in production environments.
- Architected and integrated **RESTful APIs** with dynamic React/Next.js frontends, ensuring seamless user experience across workflows.
- Implemented security best practices, **PostgreSQL** query optimisation, and scalable backend infrastructure in collaboration with cross-functional teams.

Edubricz Technologies: Full Stack Developer Intern

Jan 2025 – Jun 2025

- Built end-to-end full-stack features using **Django REST Framework**, **React.js**, and **MySQL** for scalable web applications.
- Designed, integrated, and tested REST APIs using **Postman**, ensuring reliable client-server communication and identifying edge-case failures before release.

PROJECTS

ACCOSOL — AI-Powered Financial Management Engine

Enterprise ERP & End-to-End Accounting Automation Platform

- Automated the complete accounting lifecycle — Quotations, Purchase Orders, Invoices, and balance sheet reconciliation — through a scalable ERP workflow system.
- Designed a dynamic multi-level approval hierarchy for each transaction stage (Quotations → POs → Invoices), enabling configurable approval workflows such as Accounts → Manager → CFO.
- Integrated local AI using Ollama (Llama 3) and Tesseract.js OCR for privacy-first document extraction with a layered pipeline: Native PDF → AI Extraction → OCR → Regex fallback, along with real-time dashboards, Firebase notifications, and audit trails.
- Technologies:** React 19, TypeScript, Vite, Tailwind CSS v4, Django REST, PostgreSQL, Ollama (Llama 3.2), Tesseract.js, Firebase, jsPDF

AUTOSHINE — Waterless Car Wash Service Platform

Multi-Platform SaaS: Role-Based Workforce & Operations Management

- Built a role-based service management platform for Admin, Employee, and Customer workflows — including bookings, scheduling, complaint resolution, and recurring wash management.
- Integrated PhonePe payment gateway, Fast2SMS OTP alerts, Firebase notifications, and interactive dashboards using ApexCharts and FullCalendar.
- Developed scalable backend APIs and responsive web interfaces with SQLite-based offline storage and sync workflows for low-connectivity scenarios.
- Technologies:** Django REST Framework, React 19, TypeScript, Tailwind CSS v4, PostgreSQL, SQLite, Firebase, PhonePe API, Fast2SMS, ApexCharts, FullCalendar

MIISKY — Smart Health Food Ecosystem

HealthTech: Digital Nutrition & Personalised Meal Planning Platform

- Built a multi-role health platform connecting Patients, Nutritionists, Admins, and MicroKitchens to manage personalised meal plans, nutrition tracking, and supply-chain coordination.
- Implemented automated background workflows using Celery and Redis for diet-plan expiration, invoice generation, and scheduled nutrition reporting.
- Developed secure REST APIs, dynamic meal scheduling, and real-time health management workflows with role-based access and payment integration support.
- Technologies:** Django REST Framework, React.js, TypeScript, PostgreSQL, Celery, Redis, JWT Authentication, Python
